

Grading table for CSS Final Exercise

Subject	Objective	Points
HTML	Correct structure of the HTML page (main elements are present)	5
	Usage of semantically correct tags (sections, articles, nav, footer, etc.)	5
	Usage of correct relative paths to media resources	10
	Overall structure correctness (correct hierarchical relations between parents and children)	15
	Correct spelling of texts in the page, pictures are not squashed	2
CSS	CSS tidinesses (less to no duplication of css properties)	15
	Correct use of css selectors (no unnecessary over specificity or going with too generic selectors)	10
	Responsiveness (correct use of media queries, grid or flex, appropriate units like: %, vh, vw, rem)	20
	Use of animations and other transitions or effects	6
DEMO	Ability to present and explain the solution	6
MISC	Overall match with the design requirements (keeping the same overall look and feel) * if changes to the required design are made willingly they will have to be explained	6
TOTAL		100 points

* The inability to demonstrate ownership over the source code (cannot answer or explain details about the implementation that will prove you are the author) will void all the work and you will be granted a final score of 0 points.

* The failure to submit the project until the set deadline will bring you a final score of 0 points.
